

## TOR for CeMOC training under Health Component of EPS-PPAF-PPR

### Introduction:

EPS is implementing a project in collaboration with Pakistan Poverty Alleviation Fund (PPAF) titled "Programme for Poverty Reduction (PPR)" in two Union Councils of district Swat, tehsil Kabal. The main activities of the project are concentrated in UC Koz Abakhel and Hazara of Tehsil Kabal, Swat.

The project aims to improve health status of project targeted communities through capacity building trainings of communities in health, nutrition, WASH and MNCH. Programme also focuses health care facilities through strengthening of existing health care facilities and establishment of health care facilities in far flung areas. The health care facilities are established for midwives/LHVs and they were trained on social enterprise in mid-wife and health. The project also focuses on behavior change of communities through IEC materials in health, nutrition, WASH and MNCH. During the initial implementation Community Resource Persons were identified & trained on basic health services, awareness raising tools & techniques, they will further disseminate the key objectives of trainings in targeted communities. The project successfully accomplished awareness campaigns on polio vaccination, immunization and WASH. The project had successfully furnished improved sanitation system of local communities through provision of latrines. Also nutritional status of malnourished children 6-59 months old and pregnant and lactating women was focused through innovation in nutrition. Efforts are made to develop the health status of project targeted communities through round table, knowledge management and district level platforms.

### Summary of the Project

#### Overall objective of the Health Programme

- Promoting and improving access to inclusive, affordable, reliable and integrated health and nutrition service that contributes in poverty alleviation of poor and underserved communities across Pakistan.
- Promote demand driven health and nutritional needs through participatory planning, linkage building, and programmatic integration, improved downward accountability of service providers and through synergies with specialized health and nutrition agencies.
- Support innovations in health service delivery methods and encourage knowledge sharing to promote sustainable community based initiatives with entrepreneurial spirit

### CeMOC

While most pregnancies and births are uneventful, are at risk. Around 15% of all pregnant women develop a potentially life-threatening complication that calls for skilled care, and some will require a major obstetrical intervention to survive. About 1,000 women die from pregnancy- or childbirth-related complications around the world every day; of these, 99% occur in low-resource countries. Improving maternal health is one of the Sustainable Development Goals (SDGs) adopted by the international community in 2015. The 3rd SDG is to achieve a 75% reduction in maternal mortality between 1990 and 2015. Emergency obstetric care (EmOC), access to family planning, and skilled

attendance at birth are three key interventions that have been implemented globally to reduce maternal mortality. Three Crucial Delays in areas where maternal mortality is highest, three crucial delays are associated with elevated rates of maternal death:

1. Delay in seeking health care (delay in recognizing the problem and delay in making a decision to seek care).
2. Delay in reaching a health facility.
3. Delay in obtaining appropriate care upon reaching a health facility.

The first two delays are issues of access, which are dependent on the patient, her family, her community, and safe and reliable transport. The third delay relates to factors in the health facility. While clinical interventions and technologies may be available to manage obstetric emergencies, several factors may contribute to suboptimal outcomes, including capacity building and strengthening awareness.

#### **Training Objectives:**

1. To develop a pool of trained volunteers to help in seeking ready access to Doctor and nearby facility.
2. To strengthen and capacitate community health resource persons on CEMOC critical issues and emergency measures.
3. To train community resource persons on timely response and proper care of critical cases.

#### **Project Area and Number of sessions**

**Participants:** 20

**Duration:** Two weeks (after date of signing agreement with EPS)

**Total no. of Trainings:** One (five days)
